

## **RE-flower 21**

I live in the countryside of Denmark. At the end of my property, I have an orangerie from where I have a view to the fields. That's where this series was born.

It is a landscape of land, water and sky. A landscape I have started paying attention to as my restlessness has diminished. It is a landscape that has awakened as I have lost muscle mass. A landscape with horizontal lines. If you only see vertical lines, it's because you are standing ...

You have to lie down... and at best on your right side :)
